PUSH THE LIMITS OF PERFORMANCE WITH THE C-5 FLEET SERIES FROM CROWN

- 1800 to 3000kg capacity with cushion or pneumatic tyre versions.
- Powerful Crown built industrial engine.
- Increased **UPTIME** with Crown's On Demand Cooling™ system, low maintenance brakes and reduced service intervals.

The New Generation of Crown Lift Trucks

Range

Crown's goal is to provide the safest, most efficient and productive lift trucks possible, from the smallest hand pallet truck to the highest-lifting turret truck. Whatever the application, there is a Crown lift truck within our electric or internal combustion ranges that will fit your requirements.

Commitment

Crown is committed to providing you with superior value, clearly seen through the design of our products, our quality manufacturing processes and by direct comparison of our unrivalled after-sales service. Crown lift trucks have been recognised worldwide for design excellence and innovation.

Quality

With over five decades of manufacturing experience, our goal is to always provide you with the safest, most efficient and ergonomic lift truck possible. Our aim in designing quality equipment is to lower your total cost of ownership and increase your uptime.

WORK ASSIST VEHICLE

Wave

The Wave Work Assist Vehicle elevates a person to effective work heights of up to 5 metres. The Wave allows one person to do a job that would normally require two employees, and does it safer, reducing the risk of injury and product damage.

STOCKPICKERS AND TURRET TRUCKS

Stockpickers

Crown supplies a full range of stockpickers and low level order pickers from the smallest model with a 1.2 metre operator reach height up to 17.1 metres of operator reach height. Every model builds confidence with features that work with the operator, both on the ground and at the highest elevations.

WALKIE STACKERS

Walkie Stackers

Crown Walkie Stackers deliver superior manoeuvrability with lift heights up to 5.5 metres. They include a number of unique features that improve stability and traction performance, both of which are critical factors in walkie applications. The precise placing and retrieval of pallets is exceptional, making it a smooth and easy job for any operator.

SIT DOWN COUNTERBALANCE FORKLIFTS

Sit Down Counterbalance

Built to satisfy the demands of both the application and the operator. The Crown electric counterbalance forklifts feature highly manoeuvrable three or four-wheel designs that are ideal for precision load placement in tight spaces.

SERIES SC

SERIES FC

STAND UP COUNTERBALANCE RIDERS

Stand Up Riders

A unique 'crossover' unit capable of operating inside narrow aisles and outside on rougher terrain. It is also highly productive as it allows for easy operator entry and exit. This is specifically designed for applications where the operator is required to constantly be on and off the truck.

SERIES RC

RIDER REACH TRUCKS

Reach Trucks

Designed to meet the highest expectations for narrow aisle applications, Crown Reach Trucks can work in aisle sizes from 2.7 metres and reach to heights of up to 13 metres. These units include many features that ensure reliability, class-leading performance and the lowest total cost of ownership in the industry. Crown Reach Trucks are available with all seating variations including sit down, stand up, walk behind or a combination. These units are market leaders in travel and lift speeds and feature AC traction and lift.
